

**Electronics Restoration-** Comes to you with full on- site mobile capabilities

Why are insurance adjusters looking for these pros – instead of the other way around? The nation’s premier commercial and industrial experts for electronics restoration, equipment recovery and IT system recovery.

Electro-Mechanical Recertifiers, Inc. (ER Inc.) is one of the most highly respected technical restoration contractors in the U.S. and the world. Most adjusters refer to them simply as, “ER,” (as in “Emergency Room, as in the first stop at the hospital where you go to get fixed after something happens.”) Omegasonics is the ultrasonic leader that adjusters are asking for *by name*. When these two restoration titans combined forces, the industry had never seen anything like it.

ER specializes in the total recovery of electro-mechanical and specialty systems, as well as bio-medical equipment, AV production equipment, food processing, laboratory equipment, material handling systems, all machinery types, communication systems and IT/computers – from mitigation through the complete restoration process. AS PREMEIR ELECTRONICS RESTORATION

PROFESSIONALS they restore water, fire and smoke damaged computers, hospital electronics (bio-medical equipment, phone and data communications devices, even machinery and equipment of all types. Most equipment types have numerous substrates – steel, stainless, iron, aluminum, plastic – nothing has proven too tough for these pros.

When ER Inc. designed and built their mobile lab to restore electronics and equipment they chose Omegasonics because of their reputation. Being used by Los Alamos Labs, the U.S. Navy, the U.S. Tank Core, Pepsi® and Miller Brewing®, and *hundreds* of restoration companies to restore everything from hard drives to cell phones, and from big screen TVs to fine china the choice was simple.

This is the same process used by CB manufacturers after they build boards to de-flux and remove soldering smoke residues and contaminates so treatment and decontamination of most fragile computer chips, delicate wiring and

water/soot drenched circuit boards are exactly what Omegasonics Restoration Pro system does best. State of the art cleaning system coupled with professional technicians and their proven processes is the key to a great Electronics Restoration and Recovery experience.

With the traveling Omegasonics systems in their mobile disaster recovery lab that they are able to respond to single loss and CAT loss events throughout the continental U.S. – now they bring their awesome technologies to the front lines with the mobile lab capabilities.

Another trade secret of ER is committed to working along with manufactures representatives, OEM's, certified service providers and repair centers to establishing protocols and operating parameters for acceptance testing to reach recertification level.

When a major corporation has been the victim of a fire, flood or other disaster and their computers, communications array, audio/visual displays and electronic data storage is at immediate risk – the entire company is often in real jeopardy and they apply immense pressure on the insurance agents and adjusters to get their company back up and running. Full recovery is our standard. Cost effective and quickest path to recovery is the goal. On time and on budget is expected.

Expert jobs like these require the right training and technology to show the client results and a job well done.

If you need assistance, contact Omegasonics and ask them to tell you more about what they do with ER that makes the adjusters and insured's come looking for them – instead of the other way around. To contact ER Inc. 7/24/365 call them at 877-378-4183 or email at [info@er-emergency.com](mailto:info@er-emergency.com) anytime for assistance.
